

To our valued customer,

WTC has stopped production of all 2050 products. This technology has served the industry for the past 15 years.

We invite you to review the 2200/4000 products for your weld control requirements through our website or contact your local sales account manager.

WTC intends to support the Technitron 2050 product line with spare components up until December 31, 2015, and repairs (subject to availability of components) up until December 31, 2019.

We would like to thank you for your support and consideration of WTC products, and look forward to supporting you in the future.

Best Regards

Steve Coe  
Director of Sales & Marketing  
Welding Technology Corporation
